

SP 4X4

Power Distribution System with Light Pipes and Voltage Meter

The Smart Power 4x4 features a VU meter to monitor input voltage, which gives the user a familiar analog style readout when monitoring voltage from a power source.

The Smart Power 4x4 also features 2 shock-mounted light posts (designed to absorb vibration and protect the internal bulbs), an on/off power switch, a separate on/off light switch, a dimmer dial, and a front-mounted circuit breaker reset switch.

The Smart Power 4x4 also features the unique "4x4" distribution on the back of the unit-four of the eight rear outputs are 1.25 inches apart. This allows the user to plug in wide power cables and multiple wall wart devices, and still have eight total power outlets to choose from. The unit has a total power capacity of 1800 watts.

The rugged, all-steel chassis occupies 1U rack space, and is intended for installation into standard 19" equipment racks.

Check out the SP 4X4 at any authorized ART Dealer today!

SPECIFICATIONS:

Voltage Metering	Input Voltage, VU Metered
Light Pipes	2 Front Pull-Out Shock-Mounted Light Pipes
Power Outlets	Eight Rear Outlets with "4 X 4" Outlet Spacing
Power Capacity	1800 Watts Capacity
Power Switch	Front, On Off
Construction	All Steel Chassis
Size	1U Rack Mountable

APPLICATIONS:

Live Sound Systems/PA, Permanent/Fixed Installations, Church, Club and Practice PA Systems
DJ Sound Systems, Monitor Systems, Home and Project Recording Studios
