PORTADRIVE LOCATION SOUND RECORDER WITH FREE WORKFLOW PACKAGE

V2.0
SOFTWARE
AVAILABLE NOW

With increasing numbers of sound mixers turning to the commercial advantages that session-based, non-linear disk recording provides, the HNB PORTADRIVE is now the indispensable audio acquisition tool on film and TV locations across the world.

Now, for a strictly limited period, all PORTADRIVES ship with a free Workflow Package comprising a PDRDSUF FireWire/USB Docking Station and a PDRDVB multi-format DVD±R/RW, DVD-RAM & CD-R/RW Back Up Drive, in addition to the standard accessories. This remarkable package provides a complete systems solution containing everything required to record, back-up and deliver post-ready audio.

PORTADRIVE:

The natural successor to timecode DAT

“Everyone – especially my clients – is ecstatic with it!”

As the natural and obvious successor to timecode DAT, PORTADRIVE has won many followers. Typical of these is busy, Vancouver-based sound mixer Brent Marchenski. A long-standing user of the HHB PORTADAT, Brent upgraded to PORTADRIVE to handle a succession of increasingly demanding film and TV projects. “Over 14 days on one TV show, I acquired 350GB of audio which was then imported directly into AVID as a seamless process – extremely exciting,” he enthuses. “In another case, we estimated that PORTADRIVE saved us \$20,000 (Canadian) in transfer time. The quality of the recording is amazing, it’s rock-solid in the field and as a tool, PORTADRIVE is completely intuitive. Everyone – especially my clients – is ecstatic with it!”

PORTADRIVE on location around the world

Workflow Innovation

Users particularly value the logical and ideal workflow PORTADRIVE presents from audio capture right through to rushes and post. With native and comprehensive support for AES31-3 ADL and Pro Tools V5 formats, including extensive iXML metadata implementation, files recorded on PORTADRIVE transfer instantly to PC and Mac DAWs, saving time and money. Utilising PORTADRIVE's multi track capabilities is proven to reduce, if not eliminate, the need for complex and costly studio ADR.
