Low Energy

Using only 3W of power compared to 40W or 60W conventional bulbs, the signs reduce power usage & running costs significantly.

Multi Colour

The signs use RGB LEDs and can be configured to display in white, green, red, blue, yellow, orange, cyan or magenta.

Compact Design

The signs don't take up much space on the wall with the perspex sign being either 20cm or 40cm in width.

Multiple Mounting Options

The signs can be flush mounted to a wall, end-mounted using the LD-KE1 kit or ceiling/desktop mounted using the LD-KC1 kit.

Single or Twin Signs

Each sign is 40cm or 20cm long. The 40cm signs can be split into two 20cm sides which can be separately, or jointly controlled, e.g. you can have a 40cm 'ON AIR' sign, or twin 2 x 20cm signs, such as 'ON AIR' and 'MIC LIVE'.

Dual Control Inputs

There are two control inputs for the signs so that, e.g. a single input can be used to control a single 'MIC LIVE' sign, or 2 inputs can be used to control a twin 'TX' and 'REH' sign with independent control of each side of the sign.

Display Modes

The signs can be configured to be on constantly, to flash, to pulse, to fade or to be off.

International Power Supply

The signs are supplied with a 6V wall-wart power supply with international adapters for the UK, Europe, USA and Australasia & a 5m lead.

LED Studio Signs

The new range of SignalLED illuminated signs are for use outside recording studios, on-air & production studios, meeting rooms, conference rooms and for fixed installations. The signs can be configured onsite for your particular colour and signalling requirements.

LD-20F1MCL Single flush mounting 20cm 'MIC LIVE' sign

LD-40F1ONA Single flush mounting 40cm 'ON AIR' sign showing different available colours.

Sign Wording

A number of standard signs are available with the following wording: RECORD, ON AIR, MIC LIVE, PHONE, TRAFFIC FLAG ON, AD BREAK, REHEARSAL, DOOR, OBIT, NO ENTRY, EXIT, SILENCE PLEASE, MEETING IN PROGRESS and INTERVIEW IN PROGRESS. If you need different text, or graphics, then you can order a Custom sign.

Custom Signs

Custom signs, for example with your company name or logo, can be produced for a nominal setup fee. Contact Sonifex with your requirements.

How to Order

Just select the name of the sign from the list given in the technical specification and email Sonifex at sales@sonifex.co.uk.

LD-IT Installation Tool

An installation tool, the LD-IT can be used to hold the sign in place on the wall-mount whilst you wire it up.

LD-KE1 End Mounting Kit

A mounting kit is available, LD-KE1, to mount the standard flush LD-KE1 End mounting kit. mounted sign perpendicular to a wall.

LD-KC1 Ceiling Mounting Kit

The LD-KC1 mounting kit can be used to attach a 40cm or 20cm flush mounting sign to the ceiling or a desktop.

The LD-KC1 mounting kit.

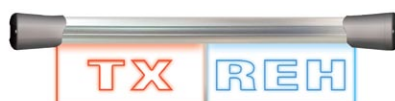

New Remote Programming Controller

The signs are preconfigured to display certain colours when the control inputs are active. Information on the colours shown can be found on the Sonifex website. Prior to 1st December 2010, the display mode and colour options could then be varied using an 8 way DIPswitch, accessible during installation. From 1st December 2010, this is different - the signs are still preconfigured, but to vary the colours and switching modes, the LD-RPC Remote Programming

New
Programming
Method

Controller must be used. This allows a much simpler way of programming any sign using a simple hand-held remote control. Please note that the control is sold separately and one control can program multiple signs.

LD-40F2TX-REH Flush mounting 40cm twin sign.

Custom single flush mounting 40cm sign.
